PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building and scaling fintech applications across web and mobile platforms, serving 30K–40K active users.

Specialized in payments, KYC workflows, and secure API integrations, with strong expertise in React, React Native, and TypeScript.

Proven track record of improving application performance, scalability, and user experience, while delivering production-ready systems in agile environments.

WORK EXPERIENCE

Flexypay Solutions Pvt. Ltd.

Full Stack Developer (Web & Mobile) | Sep 2024 – Present

Project: Flex Cards Dashboard (Admin Portal)

Tech Stack: React.js, TypeScript, Redux Toolkit, Material UI, REST APIs

- Built and scaled a fintech admin dashboard managing KYC verification, card lifecycle, transactions, settlements, and payouts.
- Improved data handling efficiency by implementing centralized state management (Redux Toolkit), reducing redundant API calls and improving UI responsiveness.
- Implemented role-based access control (RBAC) ensuring secure access to sensitive financial operations.
- Optimized large dataset rendering using server-side pagination, filtering, and sorting, improving performance for high-volume transaction data.
- Designed reusable component architecture, reducing development time for new features and improving maintainability.

Project: Flexypay Mobile App (Smart Payments Platform)

Tech Stack: React Native, TypeScript, Redux Toolkit, REST APIs

- Developed a customer-facing fintech mobile application used by 30K–40K users for payments and financial services.
- Built and optimized KYC onboarding flows (Aadhaar, PAN, selfie verification) improving onboarding completion rates and compliance.
- Engineered core payment features, including beneficiary management, transaction tracking, and wallet flows.
- Improved app scalability through modular architecture and reusable components.
- Collaborated in Agile environment (Jira, Confluence, Bitbucket) ensuring consistent delivery and code quality.
- Integrated AI-assisted development workflows (Figma sync + code generation tools), reducing UI development effort and speeding up feature delivery.

AIThinkers India Pvt. Ltd.

Frontend Developer | Dec 2021 – Jun 2022

Tech Stack: React, Redux, MUI, Ant Design

- Developed dynamic and validated forms using React Hook Form + Yup, improving data accuracy and reducing input errors.
- Built reusable UI components, increasing consistency and reducing duplication across modules.
- Delivered responsive, mobile-first UI, improving usability across devices.
- Integrated REST APIs to enable real-time dashboard data updates.

SKILLS

Languages & Frontend: JavaScript, TypeScript, React.js, React Native, Redux, HTML, CSS, SCSS

Backend & Databases: Node.js, Express.js, NestJS, MySQL, MongoDB

Tools & Platforms: Git, GitHub, Bitbucket, Postman, Docker, SonarQube

UI & Design Systems: Material UI, Ant Design

Other: REST APIs, Authentication, RBAC, Performance Optimization, Agile (Jira, Confluence)

PERSONAL PROJECTS

Crown Clothing — E-commerce Web App

Tech Stack: React, ReactDOM, SCSS, Redux, Firebase

- Built a full-featured e-commerce application with authentication, cart system, and state persistence.
- Implemented Redux-based state management for scalable frontend architecture.
- Integrated Firebase authentication and database.
