PROFESSIONAL SUMMARY

Software Engineer with experience building and scaling fintech products across mobile and web platforms, including a high-usage client-facing application (30K–40K users) and an internal operations dashboard. Specializes in payments and KYC workflows, with expertise in React, React Native, and TypeScript. Experienced in designing secure API integrations, building scalable UI architecture, and developing end-to-end product features across mobile apps and admin platforms.

WORK EXPERIENCE

Flexypay Solutions Pvt. Ltd.

Full Stack Developer (Web & Mobile) | Sep 2024 – Present

Project: Flex Cards Dashboard (Admin Portal)

Tech Stack: React.js, TypeScript, Redux Toolkit, Material UI, REST APIs

- Developed a fintech admin dashboard to manage user onboarding, KYC verification, card operations, transactions, settlements, and payouts.
- Implemented centralized state management using Redux Toolkit to handle filters, pagination, and API-driven data updates across modules.
- Designed a centralized API layer using Axios with interceptors for request/response handling and token injection.
- Built role-based access control and secure authentication using token-based APIs and protected routes.
- Built high-performance data tables using MUI DataGrid with server-side pagination, filtering, sorting, and export functionality for large datasets.
- Built reusable UI components and modular architecture to improve maintainability and scalability using MUI.

Project: Flexypay Mobile App (Smart Payments Platform)

Tech Stack: React Native, TypeScript, Redux Toolkit, REST APIs

- Developed a user-facing fintech mobile application supporting wallet, payments, and financial services for 30K–40K users.
- Implemented KYC onboarding flows using Aadhaar, PAN, and selfie verification with access control based on KYC status.
- Designed and developed modules for beneficiaries, transaction history, and payment tracking.
- Structured the app using modular navigation and reusable components for better scalability and performance.
- Managed end-to-end delivery using Jira for sprint tracking, Confluence for technical documentation, and Bitbucket for PR-based code reviews and version control.
- Integrated Figma MCP server into the development environment to enable design-to-code synchronisation; leveraged Claude Code with custom MCP configuration to automate screen scaffolding and streamline agent-driven development workflows.

AIThinkers India Pvt. Ltd.

Frontend Developer | Dec 2021 – Jun 2022

Project: 8vdx Dashboard

Tech Stack: React, Redux, ReactDOM, ReactHookForms, Yup, MUI, Ant Design

- Implemented dynamic form handling with ReactHookForms and Yup validation, reducing input errors and improving form submission reliability.
- Developed reusable component library using MUI, ensuring design consistency across the application.
- Built responsive, mobile-first interfaces in close collaboration with designers and backend engineers.
- Integrated RESTful APIs for real-time data rendering across dashboard modules.

SKILLS

Technical Skills: HTML, CSS, JavaScript, TypeScript, React.js, Redux, React Native, Material UI, SCSS, Ant Design, Node.js, Express.js, NestJS, MongoDB, MySQL, Git, GitHub, BitBucket, Postman, Docker, SonarQube

Developer Tools: Jira, Figma, Confluence, MCP Server Integration, Agile Methodology

PERSONAL PROJECTS

Crown-Clothing

An e-commerce web app featuring product browsing, cart management, user authentication via Firebase, and persistent state with Redux — built to simulate a real-world shopping experience.

Tech Stack: React, ReactRouterDom, SCSS, Redux, Firebase

GitHub: github.com/Pramodthakur16/Crown-Clothing

EDUCATION

Bachelor of Computer Applications

Delhi University

ADDITIONAL INFORMATION

Languages: English, Hindi

Interests: Badminton, Chess, Artworks, Reading Books, Photography
